

The first
GPS Camera Locator
designed for the USA

65 Camera Alerts
Directional Intelligence
Trinity 2.0 Enhanced Database

Simple . . . Intelligent . . . with state-of-the-art voice alerts

The Cheetah C50 GPS Camera Locator alerts you to:

Fixed speed cameras

Red-light cameras

“Speed-on-green” red-light cameras

Point-to-point speed cameras

Well known camera van locations

Dangerous Intersections

Accident Zones

100% Legal

State-of-the-art voice alerts

Other camera locators are really designed for Europe or Asia, so they just beep at you, or only have 3 or 4 voice alerts. US roads are different so the C50 has 65 voice alerts to make you more aware of the exact location of cameras. SpeedTone Intelligence means the C50 only ever beeps when you really need to slow down.

Directional Alerts

The C50 uses “Directional Vectors” to only alert to hazards in your direction of travel. That means better alerts and fewer false alarms than “Radius Alert” devices like radar detectors, GPS navigation, phone apps or other locators. No more false alarms for cameras on the other side of the freeway, or several city blocks away.

Easiest to use

Unlike other products, you don’t have to be tech savvy to use the C50. Plug-and-Go simplicity makes it ready to use straight out of the box. 3 user modes let you disable alerts you don’t want to hear and the user software tool makes Internet updates for new cameras quick and easy from your PC.

Best and most accurate database

Cheetah records data in the Trinity Database, that others don’t - Camera type, “Ticket” and “No-ticket” directions at camera intersections, posted speed limits, approach vectors, micro-location details. We don’t rely on “user-generated” content so we avoid the hundreds of false alarms that plague other databases. Trinity is 100% verified by our own professional database team. We are the world leading experts in camera location services covering 44 countries, so you’ll be protected at home and abroad.

2 Membership packages for updates

Gold Membership (\$29.99) gives you 3 years unlimited updates and a 1 year warranty. Platinum Membership (only \$49.99) gives Lifetime updates plus 3 years warranty. Both packages include the user software tool, email support and a newsletter.

Most feature rich camera detector

Speed limit reminders during camera alerts, automatic update reminders, adjustable warning distance, 5 speed reminder settings, mark locations, export locations to CSV file, GPS speedo, clock, compass, earphone for motorcycle use or connection to car stereos, GPS signal feed for laptops, PDAs & Netbooks, plus much more...
