Cheetah C100™ Photo Speed Camera Detector

Speed Camera, Red Light Camera, Accident Zone Detection

- Rated #1, Cheetah C100 Photo Detector, compact, sits on dash or hidden up on visor
- Alerts to Photo speed camera locations with plenty of time to slow down
- Voice Alerts, optional Wireless Val 1, Blinder, Bel STi Driver alerts
- SirfStar III GPS uplink provides fast, reliable location and speed monitoring
- Lifetime Trinity GPS updates for most photo speed camera locations

DOT bans the use of radar detectors in commercial trucks. Virginia/Wash. DC bans the use of radar detectors. MN, CA and UT ban the use of laser jammers. Our products are road certified for performance by Speed Measurement Laboratories, neither company which condones speeding. Valentine One is a trademark of Valentine Research, Ohio. Blinder is a trademark of Blinder USA.

Photo Speed Camera and Red Light Camera Detector

Cheetah C100 Photo Speed Camera Detector

Using the very latest GPS technology, the compact, Cheetah C100 Photo Speed Camera Detector alerts you with audible and visual alerts to high risk accident areas and photo-enforcement safety cameras, including Redflex, ATS, Nestor, Lasercraft, Gatso, Redspeed, Traffipax, TruVelo, SPECS Average Speed cameras, Watchman, Speedcurb and many more.

It's like having a photo speed camera insurance policy in the car

with you, keeping you alert to approaching **red light intersection cameras** and **speed cameras** installed alongside your suburban roads. There's an option to enable alerts for well known speed trap sites, and you can even mark up to 100 locations for your own personal reminders.

These same photo speed camera systems are also going to "Speed on Green" in many cities. It used to be that running a red light got you a ticket; **now going too fast on a green light will get you a speeding ticket too!** Get the Cheetah GPS Safety mirror and give yourself the reminder before you approach them.

With the number of speeding cameras set to dramatically increase and accident data changing constantly, Cheetah work tirelessly to verify new locations and delete obsolete ones in the USA, Canada and Europe, covering a total of 37 countries around the world. These database updates are easily downloaded via the internet into your Cheetah C100 using the supplied software.

Trinity Speed Camera Database

All Cheetah GPS camera detectors come pre-loaded with the local Trinity Speed Camera Database at the time of purchase. We recommend you update the memory about once a month.

Widest Coverage

The Trinity database is the largest database of speed cameras in the world, containing details of speed and red-light camera locations in 37 countries. Coverage includes the USA, Canada, UK (England, Scotland, Wales, Northern Ireland, Australia, New Zealand, Andorra, Austria, Belgium, Bosnia and Herzegovina, Croatia, Czech Republic, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Lichtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden and Switzerland.
