Cheetah M27 Motorcycle Laser Jammer

Front and rear laser gun detection and jamming, WEB Updates

- Rated #1, Cheetah M27 Rider, dual laser modules provide 360 motorcycle defense
- Jams all laser guns front and rear, WEB Ready Updates, wireless alerts to your helmet
- Install on Suzuki, BMW, Harley Davidson, Honda, Kawasaki and more
- Optional Wireless alerts for Passport 9500ix, Bel STi Driver, Valentine One Radar Detector

Superb Motorcycle Laser Detection and Laser Jamming

A laser gun can record your speed in less than two tenths (0.2) of a second, so even if the best radar/laser detector alerts you, it is too late to react since your speed has already been recorded. The CheetahM27 laser jammer stops police laser from working, giving you valuable time to adjust your speed if you need to. Using speed trap alerts effectively on a motorcycle has always been difficult...until now. The Cheetah M27 motorcycle laser jammer combines WIRELESS HELMET LED ALERT, watertight fittings and a Blinder M27 Laser Jammer modified especially for motorcycles. If you like the Bel STi Driver, Passport 9500ix or Valentine One, each of these best radar detectors can be used to send wireless radar alerts to your helmet. This motorcycle laser jammer is designed for Harley Davidson motorcycles, Honda cruisers, BMW, Kawasaki motorcycles and others. Don't worry about that laser gun aimed at you. The Wireless Helmet Alert is battery operated with a typical 40 hours ride time. It is motion sensitive and switches itself off 10 minutes after the jammer is switched off and no movement is detected. Get protected by blanking the laser gun until you adjust your speed.

Combine the Cheetah M27 Laser Jammer with the Passport 9500ix, Bel STi Driver or Valentine One radar detector for a complete motorcycle radar detector, laser detector and laser jamming system. When you feel it is time to update the Blinder M27, simply send the M27 interface module into Cheetah USA and they will update to the latest jamming codes.
