PROWLER Remote™ System, PRS2-B™

Active Laser Detection and Jamming; Photo Detection; X, K, Ka radar detection

- Blinder M45 Laser Jammer, 2 front + 2 rear, hidden installation
- Bel RX75 Dual Radar Detector, 1 front RX75, hidden installation
- COMPACT Modules with Excellent High Performance
- Front/Rear Protection - Sport Cars, Passenger Cars, Small SUVs
- System Tested Prior to Shipment to Ensure 100% Operation on Installation

DOT bans the use of radar detectors in commercial trucks. Virginia/Wash. DC bans the use of radar detectors. MN, CA and UT ban the use of laser jammers. TLP products are road certified for performance by Speed Measurement Laboratories, neither company which condones speeding. Bel RX75 is a trademark of Beltronics, Ohio, USA. Blinder is a trademark of Blinder USA, a partner of Tiger Lily Products.

High Performance, Front/Rear, Hidden Radar Detection and Laser Jamming \$1679.90 ★★★★★

RX75 FRONT

M45 FRONT

Our PROWLER Remote™ System, PRS2-B™ provides 4 high performance hidden, active laser jammer modules, combined with one hidden, under bumper or behind grille mounted Bel RX75 radar detector. The BEL RX75 offers excellent detection of L, X, K, Ka radar detection, and is 100% invisible to VG2, Spectre I & the new VG4 RDD (radar detector detectors). It is partially invisible to Spectre II, Spectre III, Stalcar (used in Australia) RDD. Front and rear detection is provided with display, audio and visual alerts, power on/off along with voice alerts. Our Blinder M45 X-Treme™, Laser Jammers are #1 in the world to defeat/detect every known laser gun made. Two laser jammer modules are hidden in the front grille and two laser jammer modules are hidden to the left/right of the rear license plate. The PRS2-B provides 4 star performance rating for your driving protection. Tiger Lily Products tests each PRS2-B component prior to shipping to you!

Speed Measurement Labs (SML) is the industry standard for testing all radar guns, laser guns, detectors, jammers, etc. Here's what SML says about our Blinder™ M20 and M40 products, recently updated by the M45 and M25: "It [Blinder™] successfully jammed every laser gun, every time, in every targeting circumstance, from every distance. The Blinder completely jammed laser guns from the point of targeting continually to the laser gun's location. The Blinder is the most effective laser countermeasure ever evaluated by Speed Measurement Laboratories, Inc. SML does not condone nor promote use of any countermeasure, but admires the technological superiority of the Blinder X-Treme in rendering laser speed gun enforcement useless."

The front and rear radar/laser alerts of the PRS2-B warn the driver to check their speed, while the front and rear laser jamming blanks out any laser gun display. After the driver safely adjusts speed, we recommend the driver to turn the jammer off until after driving through the laser trap, allowing your new adjusted speed to be detected. Now you appear like an average driver. Once safely through the radar/laser trap, turn the M45 power back on and continue your trip. Each product has aced the tough, Speed Measurement Lab tests held every year in El Paso, TX. Only Tiger Lily Products and our authorized distributors offer this superb level of radar/photo detection and laser jammer countermeasure system.
