## PROWLER Remote™ System, PRS3-V™

Laser Detection/Jamming; Photo Detection; X, Ku, K, Ka, POP3 K/Ka, Euro Photo Ka Narrowband

- Rated #1, M25 Laser Jammer, 2 laser modules, Hidden Mount
- Rated #1, V1 Remote Radar Detector, front and side detection, Hidden Mount
- Programming: L, X, K, Ka Superwide; or L, Ku, K Euro, Ka Narrowband Euro
- Front and Side Protection for Pickup Trucks and Large SUVs
- System Tested Prior to Shipment to Ensure 100% Operation on Installation

DOT bans the use of radar detectors in commercial trucks. Virginia/Wash. DC bans the use of radar detectors. MN, CA and UT ban the use of laser jammers. Our products are road certified for performance by Speed Measurement Laboratories, neither company which condones speeding. Valentine One is a trademark of Valentine Research, Ohio. Blinder is a trademark of Blinder USA.

## High Performance, Hidden Radar Detection and Laser Jamming

V1  
REMOTE  
FRONT

Blinder M25 Front

In order for a good radar detector to provide you protection, it must detect weak radar signals coming from hidden radar traps as you are driving over a hill top. Average radar detectors can not do this, but the Valentine One and V1 Remote are absolutely superb at locating these hidden radar traps.

Our PROWLER Remote™ System, PRS3-V™ provides protection against radar, laser and photo in the world. One V1 Remote is provided for front and side radar detection; and can be programmed by Tiger Lily Products to detect L, X, K, Ka Superwide and POP3 radar detection in USA/Canada/NZ/AUS countries. Or it can be programmed for L, Ku, Ka Narrowband Euro (Euro Photo traps) and POP3 radar detection for

European drivers. The V1 is 100% invisible to VG2, VG4 and Spectre II RDD (radar detector detectors). It is invisible to Spectre III, Spectre IV and Stalcar RDD at greater than 600 feet from the RDD device. The V1 Remote easily detects the hidden "Over the Hill" radar traps and the speed traps "hiding around the curves." Photo radar detection is provided with display, audio and visual alert, plus power on/off. The M25 Laser Jammer is superb to detect and jam every known laser gun used. Two powerful M25 Infrared Laser Jammers are installed in the front grille. A self-test mode allows you to check and confirm operation any time you wish. The PRS3-V provides a 4.5 star performance rating to protect your driving.

Speed Measurement Labs (SML) is the industry standard for testing all radar guns, laser guns, detectors, jammers, and has tested our Blinder M25 and M45 laser jammers with #1 performance response.

The front radar/laser alerts of the PRS3-V warn the driver to check their speed, while the front laser jamming blanks any laser gun display. After the driver safely adjusts speed, the driver should turn the laser jammers off, allowing your new adjusted speed to be detected by the laser gun. Now you appear like an average driver. Once safely through the laser trap, turn the M25 power back on and continue your trip. If you want directional radar indicators and laser jamming, the PRS1-V-360 is what you are looking for. Only 1stRadarDetectors and authorized distributors offer this superb, high performance, radar detection, photo detection, photo jamming and laser jamming countermeasure system.
