PROWLER Remote™ System, PRS4-B™

- Active Laser Jamming + X, Ku, K, Ka Superwide, POP3, radar detection
- Rated #1, Blinder M25 Laser Jammer, 2 modules, grille mounted
- Rated #2, Bel RX65 Radar Detector, 1, front windshield mounted
- Superb, Front Only, High Performance Protection, USA, CA, MX, Taiwan,
- Belgium, South & Central America, Taiwan, USA

DOT bans the use of radar detectors in commercial trucks. Virginia/Wash. DC bans the use of radar detectors. MN, CA and UT ban the use of laser jammers. TLP products are road certified for performance by Speed Measurement Laboratories, neither company which condones speeding. Bel RX65 is a trademark of Beltronics, Ohio, USA. Blinder is a trademark of Blinder USA, a partner of Tiger Lily Products.

High Performance Radar Detection and Laser Jamming

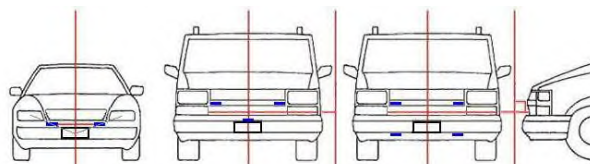

BELTRONICS™

Professional Series

Our PROWLER Remote™ System, PRS4-B™ provides 2, high performance, hidden, active laser jammer modules combined with a single windshield mounted Bel RX65 radar detector. The BEL RX65 offers superb detection of L, X, K, Ka, POP3 radar detection; or program for Euro Ku, Euro K and Euro Narrowband Ka. The RX65 is 100% invisible to VG2 and VG4 RDD (radar detector detectors); but only partially invisible to Spectre II, Spectre III, the new Spectre IV; and Stalcar RDD used in Australia. Front radar detection is provided with display, audio and visual and voice alerts, power on/off. Our Blinder™ M25 X-Treme, Laser Jammer is #1 in the world to defeat/detect every known laser gun made. Two laser jammer modules are hidden in the front grille. The PRS4-B provides a 4.5 star performance rating.

Speed Measurement Labs (SML) is the industry standard for testing all radar guns, laser guns, detectors, jammers, etc. Here's what SML says about our Blinder™ M20 and M40 products, recently updated by the M45 and M25: "It [Blinder™] successfully jammed every laser gun, every time, in every targeting circumstance, from every distance. The Blinder completely jammed laser guns from the point of targeting continually to the laser gun's location. The Blinder is the most effective laser countermeasure ever evaluated by Speed Measurement Laboratories, Inc. SML does not condone nor promote use of any countermeasure, but admires the technological superiority of the Blinder X-Treme in rendering laser speed gun enforcement useless."

The front radar/laser alerts of the PRS4-B warn the driver to check their speed, while the front laser jamming blanks out any laser gun display. After the driver safely adjusts speed, we recommend the driver to turn the jammer off until after driving through the laser trap, allowing your new adjusted speed to be detected. Now you appear like an average driver. Once safely through the radar/laser trap, turn the M25 power back on and continue your trip. Each sub-system has aced the tough, Speed Measurement Lab tests held every year in El Paso, TX. Only Tiger Lily Products and authorized distributors offer this ultimate, high level, radar/photo detection and laser jammer countermeasure system.
