## PROWLER Remote™ System, PRS4-V™

Laser Detection/Jamming; Photo Detection; X, Ku, K, Ka, POP3 K/Ka, Euro Photo Ka Narrowband

- Rated #1, M45 Laser Jammer, 4 laser modules, Hidden Mount
- Rated #2, Valentine One Radar Detector, front/rear/side detection, Windshield
- Programming: L, X, K, Ka Superwide; or L, Ku, K Euro, Ka Narrowband Euro
- 360 degree, Front, Rear and Side Protection for Pickup Trucks and Large SUVs
- System Tested Prior to Shipment to Ensure 100% Operation on Installation

DOT bans the use of radar detectors in commercial trucks. Virginia/Wash. DC bans the use of radar detectors. MN, CA and UT ban the use of laser jammers. Our products are road certified for performance by Speed Measurement Laboratories, neither company which condones speeding. Valentine One is a trademark of Valentine Research, Ohio. Blinder is a trademark of Blinder USA.

### 2 Band POP 3 Detection MPH Industries Radar Guns: Enforcer™ K, Ka + BEE™ III Ka

Our PROWLER Remote™ System, PRS4-V™ provides the very best 360 degree protection against radar, laser and photo in the world. A Valentine One is provided for front/rear/side radar detection; and can be programmed by Tiger Lily Products to detect L, X, K, Ka Superwide and

POP3 radar detection in USA/Canada/NZ/AUS countries. Or it can be programmed for L, Ku, Ka Narrowband Euro (Euro Photo traps) and POP3 radar detection for European drivers. The V1 is 100% invisible to VG2, VG4 and Spectre I RDD (radar detector detectors). It is not invisible to Spectre II, Spectre III, Spectre IV or Stalcar RDD closer than 600 feet on the RDD device. The Valentine one easily detects the hidden "Over the Hill" radar traps and the speed traps "hiding around the curves." Front and rear photo radar detection is provided with dual displays, audio and visual alerts and power on/off. The M45 Laser Jammer is superb to detect and jam every known laser gun used. Four powerful M45 Infrared

In order for a good radar detector to provide you protection, it must detect weak radar signals coming from hidden radar traps as you are driving over a hill top. Average radar detectors can not do this, but the Valentine One and V1 Remote are absolutely superb at locating these hidden radar traps.

Laser Jammers are installed in the front grille, two in the front grille and two rear, left and right of the rear license plate. A self-test mode allows you to check and confirm operation any time you wish. The PRS4-V provides a 5 star performance rating to protect your driving. Speed Measurement Labs (SML) is the industry standard for testing all radar guns, laser guns, detectors, jammers, and has tested our Blinder M25 and M45 laser jammers with #1 performance response.

allowing your new adjusted speed to be detected by the laser gun. Now you appear like an average driver. Once safely through the laser trap, turn the M45 Laser Jammer power back on and continue your trip. Only Tiger Lily Products and authorized distributors offer this superb, high performance, radar detection, photo detection, photo jamming and laser jamming countermeasure system.

The front and rear radar/laser alerts of the PRS4-V warn the driver to check their speed, while the front and rear laser jamming blanks any laser gun display. After the driver safely adjusts speed, the driver should turn the laser jammers off,
