### PROWLER Remote™ System, PRS4-ix-47™

Front/Rear Laser Jamming; GPS Speed Camera Locator; X, K, Ku, Ka, POP3, Over the Hill Detection

- Rated #1, Blinder M47 Laser Jammer, 4 front modules, Hidden Mount
- Rated #1, Escort Passport 9500ix Radar Detector, 1, front Windshield Mount
- Superb, front, high performance protection for USA, Canada
- Optional M27 Laser Jammer and Passport 9500ix
- New Blinder Laser Park Assist Mode

### High Performance Radar, Photo Detection, Laser Jamming

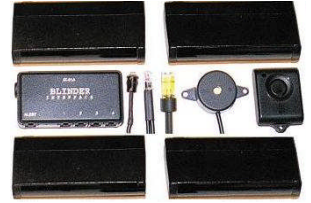

Passport 9500ix

Blinder 47

Optional M27

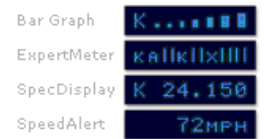

Standard M47 Layout

Our **PROWLER Remote™ System, PRS4-ix-47™** provides 4 high performance, hidden, active laser jammer modules combined with a single windshield mounted, Escort 9500ix Radar detector. The **Escort 9500ix** is the only radar detector that offers GPS memory location packaged with radar detection, voice alerts, L, X, Ku, K, Ka, POP3, and Photo Speed Camera radar detection. And the 9500ix will alert you if you go over a preset speed limit. It is 100% invisible to VG2, the new VG4 and Spectre II RDD (radar detector detectors), but can be detected by Spectre III, IV and IV+, and Stalcar RDD (used in Australia). Front radar detection is provided with a brilliant blue matrix LED display, which also indicates your speed. Frequency of the radar band can also be displayed, along with audio/visual/voice alerts. Our **Blinder™M47** Laser Jammer is #1 in the world to defeat/detect every known laser gun made. Four laser jammer modules are hidden in the front grille. **The PRS4-ix-47™ provides a 5 star performance rating.**

Speed Measurement Labs (SML) is the industry standard for testing all radar guns, laser guns, detectors, jammers, etc. Here's what SML says about our Blinder™M47 and M27 products, recently tested by SML 2009: "Graphs are great, but not needed here. In the 162 runs against all lasers at 1000 ft. and 500 ft. cones by the [Chevy 2500HD Silverado] truck, the [GT] Mustang and the motorcycle, all with a Blinder laser jammer mounted, Blinder successfully jammed each laser gun, each time. We are still scratching our heads on how Blinder did it." [SML2009](#)

The radar/laser alerts of the PRS4-ix-47™ warn the driver to check their speed, while the M47 laser jamming blanks out any laser gun display. After the driver safely adjusts speed, we recommend the driver to turn the jammer off until after driving through the laser trap, allowing your new adjusted speed to be detected. Now you appear like an average driver. Once safely through the radar/laser trap, turn the M47 power back on and continue your trip. Each product has aced the Speed Measurement Lab tests held annually in El Paso, TX.

mini USB port for updates

Travel Case, Smart Cord, Windshield Mount & Suction Cups Included
