PROWLER Remote™ System, PRS4-ixm™

Front/Rear Laser Jamming; GPS Speed Camera Locator; X, K, Ku, Ka, POP3, Over the Hill Detection

- Rated #1, Cheetah M27 Motorcycle Laser Jammer, Qty 2, 1 front and 1 rear laser jammer
- Rated #1, Escort Passport 9500ix Radar Detector, 1, front Windshield Mount
- Superb, high performance, RADAR, LASER, PHOTO motorcycle protection; USA, Canada
- Wireless Helmet Display provides both radar and laser alerts to an LED helmet display alert

High Performance Motorcycle Radar & Photo Detection, Laser Jamming

Passport 9500ix

Cheetah M27 Motorcycle Laser Jammer

Wireless Helmet Alerts, GPS Updates, Laser Updates

Our PROWLER Remote™ System, PRS4-ixm™ provides 2 high performance, hidden, Cheetah M27 laser Jammer modules combined with a single Escort 9500ix Radar detector. The Escort 9500ix is the only radar detector that offers GPS memory location packaged with radar detection, voice alerts, L, X, Ku, K, Ka, POP3, and Photo Speed Camera radar detection. And the 9500ix will alert you if you go over a preset speed limit. It is 100% invisible to VG2, the new VG4 and Spectre II RDD (radar detector detectors), but can be detected by Spectre III, IV and IV+, and Stalcar RDD (used in Australia). Front radar detection is provided with a brilliant blue matrix LED display, which also indicates your speed. Frequency of the radar band can also be displayed, along with audio/visual/voice alerts. Our Cheetah M27™ Laser Jammer is #1 in the world to defeat/detect every known laser gun made. Two laser jammer modules, 1 front and 1 rear, detect front and rear laser guns. The 9500ix, Cheetah M27, Wireless Helmet Display for radar and laser is provided. The PRS4-ixm™ provides a 5+ star performance rating.

Speed Measurement Labs (SML) is the industry standard for testing all radar guns, laser guns, detectors, jammers, etc. Here's what SML says about our Blinder™M47 andM27 products, recently tested by SML 2009: "Graphs are great, but not needed here. In the 162 runs against all lasers at 1000 ft. and 500 ft. cones by the [Chevy 2500HD Silverado] truck, the [GT] Mustang and the motorcycle, all with a Blinder laser jammer mounted, Blinder successfully jammed each laser gun, each time. We are still scratching our heads on how Blinder did it." SML2009

The radar/laser alerts of the PRS4-ixm™ warn the driver to check their speed, while the M27 laser jamming blanks out any laser gun display. After the driver safely adjusts speed, we recommend the driver to turn the jammer off using the water tight Blinder power switch, allowing your new adjusted speed to be detected. The 9500ix will automatically remember false radar locations, alerting only to real radar and photo speed traps, keeping your attention on driving your motorcycle. The Motorcycle Mount, different for each motorcycle, is optional, purchased from TechMounts.com. Each product has aced the Speed Measurement Lab tests held annually in El Paso, TX.

Travel Case, Smart Cord, Windshield Mount & Suction Cups Included
