### PROWLER Remote™ System, PRS4-V™

- Active Front/Rear Laser Jamming; X, K, Ku, Ka, Dual POP3, Instant On, Over the Hill Radar
- Rated #1, Blinder™ M47 Laser Jammer, 3 front & 1 rear, Hidden Mount
- Rated #4, Valentine One™ Radar Detector, 1 front, Windshield Mount
- Rated #1, Optional Cheetah C100 Photo Speed Camera Detector
- Programming for EURO Ku and Ka Narrowband Radar Programming

DOT bans the use of radar detectors in commercial trucks. Virginia/Wash. DC bans the use of radar detectors. MN, CA, TN, NB, OK, CA and UT ban the use of laser jammers. 1stRD products are road certified for performance by Speed Measurement Laboratories, neither company which condones speeding. Valentine 1 is a trademark of Escort, Ohio, USA. Blinder is a trademark of Blinder USA, a partner of 1stRadarDetectors.com.

### High Performance Radar and Photo Detection, Laser Jamming

### Military Strategists Agree...

Our PROWLER Remote™ System, PRS4-V™ provides 4 hidden, high performance M47 laser jammer modules combined with a single windshield mounted, Valentine One radar detector. The Valentine One offers superb detection of L, X, Ku, K, Ka, Dual Band POP3, Photo radar detection. Optionally, it can be programmed to detect Euro K, Euro Narrowband Ka Photo [(33.8GHz and 34.2-34.45GHz). The Valentine One is 100% invisible to VG2, VG4 and Spectre II RDD (radar detector detectors). It is 90% invisible to Spectre III, IV, IV+ and Stalcar RDD (used in Australia) at a distances beyond 650 feet. Front/Rear/Side radar detection is provided with a display pointing the direction of the radar/laser threat, signal strength, audio/visual alerts and power on/off. Our Blinder™ M47 X-Treme, Laser Jammer is #1 in the world to defeat/detect every known laser gun made. Three laser jammer modules are hidden in the front grille and 1 on the rear bumper. The PRS4-V-360 provides excellent, 4.5 star performance for front/rear radar detection and laser jamming. The Cheetah C100 is a superb, compact, Photo Detector to protect you from traffic cameras and photo radar tickets around the world. It is less expensive than a typical GPS radar detector. And it is small and portable! Using the very latest GPS technology, the compact, Cheetah C100 Photo Speed Camera Detector alerts you with audible, voice and visual alerts to photo-enforcement traffic cameras, including Redflex, ATS, Nestor, Lasercraft, Gatso, Redspeed, Traffipax, TruVelo, SPECS Average speed cameras, Watchman, Speedcurb; as well as high risk accident locations. SELECT V1+M47+C100 or V1 + M47. Valentine 1 can be ordered with EURO Radar programming.

Speed Measurement Labs (SML) is the industry standard for testing all radar guns, laser guns, detectors, jammers, etc. Here's what SML says about our Blinder™ M47 and M27 products, recently tested by SML 2009: "Graphs are great, but not needed here. In the 162 runs against all lasers at 1000 ft. and 500 ft. cones by the [Chevy 2500HD Silverado] truck, the [GT] Mustang and the motorcycle, all with a Blinder laser jammer mounted, Blinder successfully jammed each laser gun, each time. We are still scratching our heads on how Blinder did it." SML 2009

The radar/laser alerts of the PRS4-V™ warn the driver to check their speed, while the M47 laser jamming blanks out any laser gun display. After the driver safely adjusts speed, we recommend the driver to turn the jammer off until after driving through the laser trap, allowing your new adjusted speed to be detected. Now you appear like an average driver. Once safely through the radar/laser trap, turn the M47 power back on and continue your trip. Each product has aced the tough, Speed Measurement Lab tests held every year in El Paso, TX.
