Countermeasures
Radar - Laser - Photo

PROWLER Remote™ System, PRS4-Vm™

Front/Rear Laser Jamming; X, K, Ku, Ka, Narrowband Euro Photo Ka, POP3, Over the Hill

- Rated #1, Cheetah M27 Motorcycle Laser Jammer, Qty 2, 1 front and 1 rear laser jammer
- Rated #4, Valentine One Radar Detector, Qty 1, Handlebar Mount Optional
- Superb, high performance, RADAR, LASER motorcycle protection; USA, Canada, Europe
- Wireless Helmet Display provides both radar and laser alerts to an LED helmet alert

DOT bans the use of radar detectors in commercial trucks. Virginia/Wash. DC bans the use of radar detectors. MN, CA, TN, NB, OK, CA and UT ban the use of laser jammers. 1stRD products are road certified for performance by Speed Measurement Laboratories, neither company which condones speeding. Valentine 1 is a trademark of Valentine, Ohio, USA. Cheetah is a trademark of Cheetah, UK, a partner of 1stRadarDetectors.com.

Our PROWLER Remote™ System, PRS4-Vm™ provides 2 high performance, hidden, Cheetah M27 laser jammer modules combined with a single Valentine One radar detector. The V1 is the only radar detector that offers a front and rear radar antenna, and provides a directional arrow indicator, which points to the radar speed trap. Audio alerts are provided on Laser; X, Ku, K, Ka band radar; POP3; and narrow band Euro radar. The Valentine 1 is 100% invisible to VG2, the new VG4 and Spectre II RDD (radar detector detectors), but can be detected by Spectre III, IV and IV+, and Stalcar RDD used in Australia. Front radar detection at 9 miles and "Over the Hill" radar detection is provided with a red LED display. The Cheetah M27™ Laser Jammer is #1 in the world to defeat/detect every known laser gun made. Two laser jammer modules, 1 front and 1 rear, can detect and jam front and rear laser guns. The Valentine One, Cheetah M27, Wireless Helmet Display for radar and laser is provided. The PRS4-Vm™ provides a 4.5+ star performance rating. Speed Measurement Labs (SML) is the industry standard for testing all radar guns, laser guns, detectors, jammers, etc. Here's what SML says about our Blinder™ M47 and M27 products, recently tested by SML 2009: "Graphs are great, but not needed here. In the 162 runs against all lasers at 1000 ft. and 500 ft. cones by the [Chevy 2500HD Silverado] truck, the [GT] Mustang and the motorcycle, all with a Blinder laser jammer mounted, Blinder successfully jammed each laser gun, each time. We are still scratching our heads on how Blinder did it." SML 2009. The radar/laser alerts of the PRS4-Vm™ warn the driver to check their speed, while the M27 laser jamming blanks out any laser gun display. After the driver safely adjusts speed, we recommend the driver to turn the jammer off using the water tight Blinder power switch, allowing your new adjusted speed to be detected. The Valentine One will point in the direction of the radar trap; front, rear and side radar alerts. The Motorcycle Mount, different for each motorcycle, is optional, purchased from TechMounts.com. Each product has aced the Speed Measurement Lab tests held annually in El Paso, TX.

Bogey Counter

Tells how many. Radar hiding within a false alarm? Two radars working the same road? Reads instantly.

Muted Volume Lever

Sets volume you hear after muting.

Control Knob

Turn On/Off, adjust volume, press to mute.

Rear Sensor

Scans through rear glass for laser behind.

Radar Locator

Tracks multiple radars simultaneously and points to each.

Radar Strength

More LEDs glow as radar strengthens.

Threat ID

LED identifies laser or radar band.

Rear Antenna

Scans through rear glass for radar behind.
