## PROWLER Remote™ System, PRS4-ix™

Front Laser Jamming; GPS Photo Locator; X, K, Ku, Ka, POP3, Instant On, Over the Hill

- Rated #1, Blinder™ M45 Laser Jammer, 4 front modules, Hidden Mount
- Rated #1, Escort Passport 9500ix Radar Detector, 1, front Windshield Mount
- Superb, front, high performance protection for USA, Canada, Belgium Taiwan, Hong Kong, New Zealand, South/Central America
- Optional PRS4-i includes Passport 9500i and Blinder M25 Laser Jammer

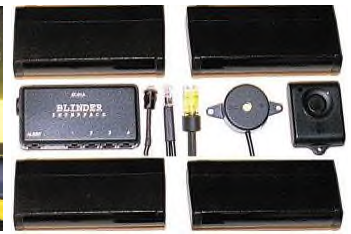

DOT bans the use of radar detectors in commercial trucks. Virginia/Wash. DC bans the use of radar detectors. MN, CA and UT ban the use of laser jammers. Our products are road certified for performance by Speed Measurement Laboratories, neither company which condones speeding. Escort 9500ix is a trademark of Escort, Ohio, USA. Blinder is a trademark of Blinder USA, a partner of 1stRadarDetectors.

## High Performance Radar & Speed Camera, Voice Alerts, Laser Jamming

mini USB port for GPS updates

Passport 9500ix

Blinder M45 Laser Jammer

Our PROWLER Remote™ System, PRS4-ix™ provides 4 high performance, hidden, active laser jammer modules combined with a single windshield mounted, Escort 9500ix Radar detector. The Escort 9500ix is the only radar detector that combines Laser, X, K, Ku, Ka radar detection with Speed camera and red light intersection camera detection, voice alerts and POP3 radar. GPS position can be marked for photo trap reminders. And you can tell the 9500ix to alert you if you go over a preset speed limit!!! The 9500ix also prepares for Ku radar detection. It is 100% invisible to VG2, the new VG4 and Spectre II, Spectre III RDD (radar detector detectors). It is partially invisible to Spectre IV RDD, and Stalcar RDD used in Australia beyond distances of 650 feet. Front radar detection is provided with blue LED display. The 9500ix also indicates your speed!!! Frequency of the radar band can also be displayed, along with audio/visual/voice alerts. Our Blinder™ M45 Laser Jammer is #1 in the world to defeat/detect every known laser gun made. Four laser jammer modules are hidden in the front grille and under the rear bumper. The PRS4-ix™ provides a 5 star performance rating.

Speed Measurement Labs (SML) is the industry standard for testing all radar guns, laser guns, detectors, jammers, etc. Here's what SML says about our Blinder™ M20 and M40 products, recently updated by the M45 and M25: "It [Blinder™] successfully jammed every laser gun, every time, in every targeting circumstance, from every distance. The Blinder completely jammed laser guns from the point of targeting continually to the laser gun's location. The Blinder is the most effective laser countermeasure ever evaluated by Speed Measurement Laboratories, Inc. SML does not condone nor promote use of any countermeasure, but admires the technological superiority of the Blinder X-Treme in rendering laser speed gun enforcement useless."

"Your present radar detector just became obsolete!" – SML, January 2007. Awarded Popular Mechanics Editor's Choice Award.

The radar/laser alerts of the Passport 9500ix radar detector with red display are combined with the M45 laser jammer to blank any laser gun display. After the driver safely adjusts speed, we recommend the driver to turn the jammer off until after driving through the laser trap, allowing your new adjusted speed to be detected. Now you appear like an average driver. Once safely through the radar/laser trap, turn the M45 power back on and continue your trip. Only 1stRadarDetectors and its authorized distributors offer this ultimate, high level, radar and photo detection and laser jammer countermeasure system.
