Passport 9500ci™ GPS Photo, Radar, Laser System

Hidden Laser, Radar, Photo Detection; X, Ku, K, Ka superwide and POP3 radar

- X, L, K, Ka Superwide, POP3 Radar Detection – USA, Canada, Mexico
- Total Invisibility to VG2, VG4, Spectre II, III, IV and Stalcar RDD
- Over-the-Hill Radar Detection – detects 100% @ ½ mile Over the Hill
- Speed Camera Detection – Red Light Camera and Speed Camera Alert
- Compact Blue Display, Control Module – Plug and Play Connections, Voice Alerts

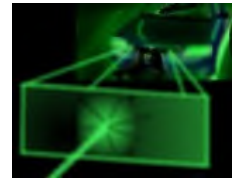

DOT bans the use of radar detectors in commercial trucks. Virginia/Wash. DC bans the use of radar detectors. MN, CA, NB, TN, VA and UT ban the use of laser jammers. Our products are road certified for performance by Speed Measurement Laboratories, neither company which condones speeding. Passport 9500ci is a trademark of Escort Radar, Ohio, USA.

BEST in TEST, Front, Radar Detection, Photo Detection, Laser Jamming

The **NEW Passport 9500ci Radar Detector** is the only product in the world that brings X, K, Ka superwide radar detection, photo speed camera, red light camera, laser detection/jamming, 100% invisible to all police RDD and incorporates GPS and false alert reduction into a single compact countermeasure system. GPS memory speed camera locations and remember annoying false alert locations in front of stores using X and K band door openers. If you live in Phoenix, Houston, Seattle, Memphis, Florida, Montreal, Toronto, Quebec or any city with photo speed cameras, radar guns and laser guns, the Passport 9500ci Radar Detector is outstanding. Many of the **intersection cameras** are now **taking pictures** of drivers who **go through a green light above the posted speed**, but the 9500ci will alert you before you get to the green light, photo trap. Its performance is nothing short of outstanding. A

North American database of safety cameras eliminates most, if not all false alarms in your daily driving pattern. The 9500ci radar module uses an internal, dual, front antenna scheme to provide a significant increase in K band and Ka radar detection sensitivity, while reducing false noise alerts with the dual LNA (low noise amplifier) microwave receiver. Digital signal processing (DSP) in the Passport 9500ci provides superior range, easy mode programming and reduced false alarms for you.
