Radar - Laser - Photo

Speed Camera Defense: SCD-2, SCD-1, SCD for Vehicles

Superb Speed Camera Detector & Speed Camera Defense, License Plate Light

- Detects all Speed Cameras, Red Light Cameras and Mobile Van Speed Cameras, 100%
- Electronically protects your license plate from all double flash or single flash Speed Camera attempts
- Does not interfere with Speed Camera operation as with Flash Back Photo Jammers
- Does not interfere with Radar Guns or Magnetic strips under the road surface
- Dual Mode operation provides quick Mode change from Photo Jammer to License Plate Lights only

High Performance, Speed Camera Detector/Shield + License Plate Light Mode

The Problem: You're driving down the highway and drive by a speed camera or red light camera. The camera flashes and you did not even notice, but two weeks later you get a "Ticket in the Mail as a big \$\$\$ fine. You did not even know it detected your speed or flashed the camera at your vehicle. Safety had nothing to do with it, as it is about increasing revenue and traffic fines. The SCD Speed Camera Jammer prevents unauthorized photographs and protects your license plate s you on/off speed camera protection on your car, truck or motorcycle.

The Solution: SCD-2, SCD-1 or SCD for Cars, Trucks and SUVs

Install the SCD-2 Speed Camera Jammer on your front and rear, vehicle license plates; or install a single SCD-1 on your rear vehicle license plate. The SCD is a single license plate protection without a license plate frame.

SCD-1 Single

One License Plate Frame
License Plate Light
Emergency Vehicle Alert
Speed Camera Detector/Defender

High Impact ABS License Plate Frame
License Plate Light Accessory
Speed Camera Detector/Defender
Emergency Vehicle Detector
ET Mark

Many cities today in the USA, Canada, NZ, AU, UK have a multitude of photo speed cameras, all designed and installed to take a picture of your vehicle license plate and mail you a ticket without letting you know. The SCD-2, SCD-1 and SCD Photo Radar and Speed Camera Defense will easily protect you, because it detects every single camera flash or double camera flash attempt on your license plate. It does not matter whether you or a highway speed camera takes the picture. The SCD electronically prevents a photograph of your license plate. Driving past a speed camera, red light camera or even a Mobile Speed Photo Van does not matter. They can not photograph your license plates. It does not matter whether there are two camera attempts using white light or infrared light; the Speed Camera Jammer will still detect the camera attempt and electronically protect your license plate from being photographed. **SCD products are not designed to flash back at the camera, nor do they interfere with radar guns, magnetic strips or speed cameras.** Competitive Flash Back Jammers actually aim light at drivers behind you. Our Photo Radar (Speed Camera) Jammer does

SPEED CAMERAS and RED LIGHT CAMERAS
CANT GET IT

COMPUTER INVERSE IMAGE
CANT GET IT

not. Competitive Flash Back jammers are unable to completely block photographs from Mobile Vans, Speed Cameras or Red Light Cameras. The SCD-1, SCD-2 and SCD Photo Speed Camera Defense does it all, legally and offers a discretionary "Lights Only" mode, so that you control when to protect yourself and when to detect only. A thoughtful design for your driving habits!
