V1 Remote™, Hidden Remote Radar Detector

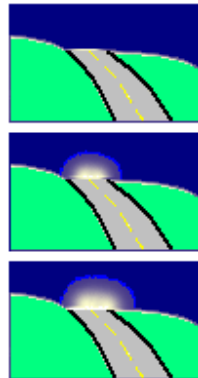

X, Ku, K, POP3 K & Ka, Ka Superwide, Instant On, Over the Hill Radar

- Hidden display and Audio control to provide audio and visual alerts
- Superb, Hidden, High Performance Protection for Americas, Asia & Europe
- Standard Programming for L, X, Ku, K, Dual POP3, Ka Super Wideband Radar Detection
- Optionally Programmed for L, Ku, Euro K, Dual POP3, Euro Ka Narrowband Radar Detection

DOT bans the use of radar detectors in commercial trucks, Virginia/Wash. DC bans the use of radar detectors. TLP products are road certified for performance by Speed Measurement Laboratories, neither company which condones speeding. Valentine One is a trademark of Valentine, Ohio, USA

High Performance Radar Detection, Hidden From Visible Site

In order for a good radar detector to provide you protection, it must detect weak radar signals coming from hidden radar traps as you are driving over a hill top. Average radar detectors can not do this, but the Valentine One and V1 Remote are absolutely superb at locating these hidden radar traps.

Our **V1 Remote™ Radar Detector** is the very best hidden remote available and provides the very best front protection against radar in the world. The **V1 Remote** is provided for front/side radar detection; and can be programmed by Tiger Lily Products to detect L, X, K, Ka Superwide and POP3 radar detection in USA/Canada/NZ/AUS countries.

It can be programmed for L, Ku, Ka Narrowband Euro (Euro Photo traps) and POP3 radar detection for European drivers. The V1 is 100% invisible to VG2, VG4 and Spectre I RDD (radar detector detectors). It is invisible to Spectre II, Spectre III, Stalcar RDD to roughly 150-450 feet from the RDD device. The V1 Remote easily detects the hidden "Over the Hill" radar traps and the speed traps "hiding around the curves."

Front and rear photo radar detection is provided with dual displays, audio and visual alerts and power on/off. Each sub-system has aced the tough, Speed Measurement Lab tests held every year in El Paso, TX. The V1 Remote is far superior to the Bel RX75 Remote, Escort SR7 Remote and the K40 Remote. It can be combined with our Blinder M20, M40 Laser Jammers, VF2 or VF3 Euro Photo Jammers for improved support. Only Tiger Lily Products and authorized distributors offer this ultimate, high performance, radar detection countermeasure. Display and Audio Control

can be located in the Ash Tray, in the center console. Etc.

Optionally Installed into the Vehicle Dash

Blinder M20 & M40 Laser Jammer
