## Valentine One™ Radar Detector

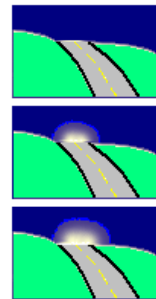

X, Ku, K, Ka Super wideband, L, Dual POP3, Instant On, "Over the Hill" Hidden Radar Traps

- Titanium case to minimize detection by Radar Detector Detectors (RDD)
- Dual Front/Rear Antennas detect front, rear, side radar
- Dual Band K and Ka, POP3, Burst Radar Detection
- L, X, Ku, K, Dual POP3, Ka Super Wideband Radar Detection
- Optional Euro Programming for L, Ku, Euro K, Dual POP3, Narrowband Ka Radar Detection

### High Performance, Front/Rear Radar and Laser Detection

**The Problem:** You're driving down the highway in the USA, Canada, Mexico, South/Central America, NZ, HK and a policeman targets your vehicle with radar. You are driving over a hill top, and you don't know there is a hidden radar trap on the other side waiting for you. You are driving around a bend in the curve with trees and a hill side on the curve, and there is a hidden trap waiting for you around the curve. A policeman is using his new MPH Bee POP3 Radar gun with burst radar capabilities, and he is shooting POP3 radar at vehicles in front of you. Most radar detectors have average performance, but the Valentine One has excellent radar detection to the front and rear of your vehicle. No other radar detector can claim dual, front and rear radar antennae with 9+ miles detection performance to the front & 2 mile rear detection performance.

In order for a good radar detector to provide you protection, it must detect weak radar signals coming from hidden radar traps as you are driving over a hill top. Average radar detectors can not do this, but the Valentine One and V1 Remote are absolutely superb at locating these hidden radar traps.

**The Solution:** Install a Valentine One in your windshield and detect everything radar gun they have in their arsenal. They want your money, and while they claim it is all about safety, the police are required to write tickets, and it is you that has what they want.

- Bogey Counter**  
Tells you how many radar alerts are hiding within a false alarm! Two radars working the same highway would alert instantly!
- Muted Volume Lever**  
Sets the volume you hear after muting.
- Control Knob**  
On/Off, adjust volume, press to mute.
- Rear Laser Sensor**  
Scans through rear glass for rear laser. Valentine is very best to detect laser guns.
- Radar Locator**  
Tracks multiple radar alerts at the same time, pointing to each radar direction.
- Radar Strength**  
More LEDs glowing means the radar is getting closer.
- Threat ID**  
LED identifies laser or X, K, Ka Radar.
- Rear Antenna**  
Scans through rear glass for radar coming from behind.

User Friendly operation. All of these parameters are discussed in each product review on our WEB site. We also provide videos where possible to show how well our products support your objectives to protect your vehicle.

**Valentine One™ will detect every radar gun that attempts to acquire your vehicle speed.**

**Detect hidden radar traps "Over the Hill"; "around Blind Curves"; 10 mile front distance; 2 miles rear; the V1 is Superb!**
